

It's our goal to get you and your summer group into GCM to enjoy your visit as quickly as possible. Please follow the procedures and policies below in order to ensure your summer field trip to GCM is smooth and swift!

### IN-PERSON FIELD TRIP PROCEDURES

- Before you enter the Museum, your total group will need to be divided into smaller groups no larger than 10 people. Each small group of 10 must include at least one (1) adult and must stay together during their time in the museum.
- All guests of the Museum over the age of 2 must wear face masks to prevent the spread of COVID-19.
- Please be prompt for your check-in slot. Your visit is a maximum of two (2) hours and it is our goal to get you into the Museum to enjoy your visit as quickly as possible. If you arrive late, you will have to wait for an open slot to check-in.
- We will not store lunches or anything you bring with you. If you are planning to eat lunch in the park, we suggest you do so at the beginning of your trip or at the end of your trip before you board your bus.

### SICK POLICY

Glazer Children's Museum strives to provide a safe and healthy environment for all our visitors. To keep everyone safe, we request the following Sick Policy be followed by our visitors, staff, and volunteers.

***As a general rule, if you or your child have a fever or are too sick to go to work or school, then you are too sick to visit the Museum.***

The following guidelines are more specific and we request that visitors with these symptoms not visit the museum. Staff may be called upon to identify the following symptoms and to ask a visitor to leave if symptoms are present. If a visitor is asked to leave due to illness, free passes to return will be given to the visitor.

- Fever
- Flu symptoms (headache, high fever, chills, lethargy, muscle aches, cough, sore throat)
- Upper Respiratory Infections (nasal congestion, runny nose, scratchy throat, painful swallowing, cough, watery eyes – with or without fever)
- Diarrhea or vomiting
- Conjunctivitis or “pink eye” infection
- Impetigo (infectious skin disease which shows up as small pimples that turn into red blisters in a circular pattern)
- Strep Throat (child must be on antibiotics for 48 hours before coming to the museum.)

For further questions or concerns please email our School & Youth Programs Manager, Emily Woods, at [ewoods@glazermuseum.org](mailto:ewoods@glazermuseum.org) or **813 443 3810**
